## 1 Task

The Test Centre for Energy Appliances was instructed to execute the measurements and calculations on the appliance TURBO ALADINO CLEAN ALL STYLE according to the Commission Regulation (EU) 2015/1185 and the Commission Delegated Regulation (EU) 2015/1186.

The tests were carried out in the laboratory of:

TÜV Rheinland Energy GmbH /CMC Centro Misura Compatibilità S.r.l. in Thiene (Italy).

Test details on the reference initial type testing report K30642021Z1 (EN 14785:2006)

## 2 Description of the appliances

Residential room sealed heating appliances fired by wood pellets without water heat exchanger for domestic central heating system. The flue discharge for pellet operation is fan assisted.

The stoves are equipped with an automatic ignition. All the models share the same basic construction of the tested one (the stove TURBO ALADINO CLEAN ALL STYLE RELAX 9) regarding the combustion air inlet, the dimensions and the shape of combustion chamber and the flueways. The only difference between each model is related to the external claddings.

The stove TURBO ALADINO CLEAN ALL STYLE RELAX 9 has been chosen from the manufacturer as representative model of the family and it may be operated with convection air fan on/off

See the reference testing report K30642021Z1 for further details.
