## 2 Description of the appliances

Residential room sealed heating appliances fired by wood pellets without water heat exchanger for domestic central heating system. The flue discharge for pellet operation is fan assisted.

The stoves are equipped with an automatic ignition. All the models share the same basic construction of the tested ones (the stove RELAX GLOBE GLASS 6,5 and RELAX GLOBE GLASS 10) regarding the combustion air inlet, the dimensions and the shape of combustion chamber and between each model is related to the external claddings.

The stoves RELAX GLOBE GLASS 6,5 and RELAX GLOBE GLASS 10 has been chosen from the manufacturer as representative models of the family and it may be operated with convection air fan on/off

See the reference testing report
